**Object Modal:**

Naukri Implementation

1. Job Request can be created by HR Team

2. Created Job Request contains the option to post to Naukri Option

3. Once the 'Post to Naukri' button is clicked, the Job Application modal will appear with the required fields and once submitted it will post the Job Application to Naukri

4. Once posted, there is an option to unpublish the job.

5. The Job Request applicants' information will automatically create an HRMS record through the POST API.

HRMS Portal record

The HRMS portal record can be created either automatically by Naukri or manually by HR

Candidates will be analyzed and moved to the next stage based on their status.

The custom implementation includes a screening pitch, custom banner, contact details, email execution, and RNR and automation based on the stage change.
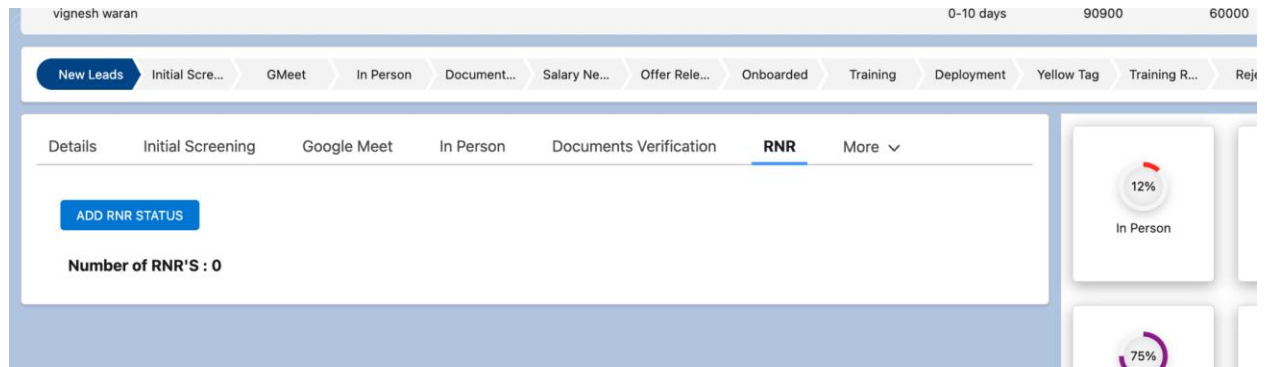

1. Quick Action to Initiate a Screening Pitch

Screening Pitch Modal

"RNR Creation - Includes information about the candidate's call history."

Contact Details component to display the candidate's details and invoke the email screen based on the candidate's status.
